CROWN BOX

A ROUND CONTAINER in CHERRY with CONTRASTING MAPLE RIM.

The cover story in Popular Woodworking October, 2016, declared these as “Rediscovering a Shaker Classic.” View the full article on our website for construction details, step photos and patterns. www.ShakerOvalBox.com

The smaller three sizes provide a nesting set while the largest serves with distinctive elegance singly, or holding the set of three. The bands of cherry with contrasting maple rims and special brass fasteners are a real eye catcher.
