

2021 CATALOG OF SHAKER BOX SUPPLIES

For over thirty years we have been introducing people to Shaker oval boxes by giving hands-on workshops in box making and supplying box makers with the wood, hardware, tools and instructional materials needed for box construction. We offer bands and tops and bottoms for a wide range of sizes and styles of boxes, carriers and trays starting from the log and overseeing cutting, drying and surfacing of all materials to insure quality. Tops and bottoms are solid wood in the smaller sizes, and special shop made plywood for larger sizes requiring the dimensional stability of cross banded boards.

The copper tacks used in oval box construction are made on machines that date back to the late 1800's. Our machines were acquired from the W.W. Cross Nail Co. when they ceased tack manufacturing in 1991. We currently make nine sizes of tacks plus the 1/2" copper shoe peg used for securing top and bottom boards when copper is preferred in place of wood pegs.

We guarantee satisfaction in all your purchases. We welcome phone orders at 517-543-5325 (9-5 eastern, M-F) and send all orders with an invoice for your payment by check after you receive it.

News for 2021

Our website continues to be complimented by those who find us there. First time box makers can take advantage of the "Getting Started Special" (page 4) with its \$50 discount. Be sure to look for the section with articles John has written for **Popular Woodworking**. See "Making Shaker Oval Boxes" #135 Aug, 2003 for step photos and patterns on how to make the nest of 5 boxes taught in our Box Basics class. Special events are scheduled for you to make your own advanced project including the Crown Box from issue #227 Oct, 2016.

The PBS program "A Craftsmen's Legacy, The Woodworker" (season 1, episode #1) can still be found on air introducing what John feels is his legacy. You'll get a glimpse into box and tool making at the Home Shop. A DVD of the program is available for free upon request in case you've missed it.

Home Shop Books

Making Wood Tools with John Wilson (page 4) was reviewed by Highland Woodworking News as "what may be the most beautiful book of the year as well as the most useful." Now in its 3rd edition, it won the 2015 Gold Award from the non-fiction authors association. (312 pages)

Shaker Oval Boxes Vol I: A Craftsman's Guide to Original, Derivative and Diverse Oval Boxes (page 4) is an illustrated overview of boxes, carriers, trays and more with helpful dimensions. (166 pages)

Shaker Oval Boxes Vol II: Projects, Plans, Processes (page 4). The complete how-to book on making oval boxes, carriers, trays and more. (225 pages)

Shaker Oval Boxes Vol III: History, Materials and Design (page 4). Here is the framework of the box making craft to complete the trilogy, beautifully bound to complement vol. I & II (249 pages)

An eBook on CD is available for all four books. It contains PDF, ePUB and MOBi files (page 4).

For all of us here at the Home Shop, may your boxes bring satisfaction to you and joy to others.

JOHN WILSON
Eric Penton

Box making in Syracuse/Pulaski, NY, the longest running event on the road for John and Eric - 26 years!

BOX MAKING SUPPLIES

☞ **FIRST TIME BOX MAKERS** We suggest the nest of five boxes (#0-#4). Throughout the supply list, hand symbols indicate wood, tacks and bench materials needed to make these boxes. See especially the "Getting Started in Box Making Special" grouping these items together for additional savings on page 4. Visit our website, ShakerOvalBox.com, for further information, instruction and photos. Be sure to see the **Popular Woodworking** Aug. 2003 article "Making Traditional Oval Boxes" for construction steps.

Payment We do not accept credit/debit cards. Our open invoice system allows you to pay by check or money order after you receive your goods. Please see the invoice found inside your package.

SUGGESTIONS FOR BENDING BOX BANDS

1. If a slicing bias is noted, try keeping the side without knife splits to the outside. In hot water "the inside of the curl is the outside of the box."
2. Have the water boiling in the soaking tray, and then work promptly so the wood is *hot at the moment you bend it*.
3. Ten minutes may be sufficient time in the water tray, but *twenty minutes* will insure that troublesome bands are fully soaked.
4. To help keep the fibers together at the moment of bending, *push the wet band* around the ends of the oval core giving the wood support with your hand.
5. When cutting the finger bevels, *develop a narrow style* so that the ends are 3/16" wide, or 1-1/2 times the tack head diameter. This minimizes curling and matches the Shaker style. Patterns for fingers are rough size. Trim to finished size with sharp knife using slight 10 degree bevel.
6. Be sure to hold *all the fingers all the time*, or else the band is likely to split up the middle between the fingers.
7. Repairs to wet bands can be made using CyanoAcrylate or CA glue.
8. Stains appearing on cherry bands after soaking are from iron (Fe) or aluminum (Al) contamination. Ground water, metal filings and sand paper grit are the most prevalent sources. These spots can be cleaned with an oxalic acid solution. Mix 1 tbs crystals to ½ pt. warm water.
